Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I can't keep up with these EMI payments every month. • I don't know if my lender will even agree to a settlement. • I wish someone could just tell me what I can realistically afford.	BORROWER IN DEBT <i>(Loan Borrower Seeking Financial Recovery)</i>	THINKS • Am I going to default and ruin my credit score? • Is there a way to negotiate without feeling embarrassed? • I need a clear, personalized plan — not generic advice.
DOES • Checks loan balance and due dates repeatedly. • Searches online for debt settlement tips and templates. • Avoids or delays calls from the lender out of anxiety.		FEELS • Anxious about mounting, unmanageable debt. • Overwhelmed by financial and legal jargon. • Hopeful when given a clear, achievable action plan.
